

Lithium in Botswana & Zimbabwe

Arkle hold 2 licences covering 837sq km in the Makadikadi Salt Pans.

Preliminary surveys have showed outcropping brines.

A follow up Transient Electromagnetic Survey will be undertaken to identify priority drilling targets.

A follow up drilling programme will follow.

In Zimbabwe we were awarded 3 small hard rock licences containing pegmatite, we have dropped one.

Discussions are ongoing on a joint venture on 2 of the licences.
